24/11/71
MEMORANDUM FOR: Chief, Budget and Fiscal Branch, OGA

SUBJECT : Household Effects - Transportation

REFERENCE : SAPC-8462 dated 25 August 1956, Subject - Same

1. Reference memo approved by Acting Director of Central Intelligence deals with the unusual travel and storage problems of Agency personnel assigned to Forward Idealist bases. The only base now in existence falling under its purview is

50X1

2. That authorization in affect applies the Joint Travel Regulations to the storage of household and personal effects and automobiles for civilian Agency personnel. However, we are to have what is to our knowledge the first case of a lateral transfer from an Idealist Forward base to a PCS assignment within the ZI other than Washington, D. C. In this case we have been requested to extend the authority for storage of household effects in the Headquarters Metropolitan Area. It is clear that once the individual is PCS to his new assignment, we may not extend the storage beyond the 60 day total temporary storage authorized for a ZI assignment. But what is not clear is whether in moving the effects from Washington to the new ZI PCS we are limited to 2500 pounds.

3. We feel that we would be held to the standardized government travel reg limitation of 2500 pounds for movement. This is because we feel the special authority granted to civilian personnel assigned to Idealist Forward bases is limited to per diem, storage, and the authority to move not to exceed 500 pounds of personal effects to the Forward base. However, due to the fact that the Joint Travel Regulations Paragraph 8007-7 is quoted in its entirety within reference we feel a clarification is in order. The clarification goes to the last sentence of that paragraph which states "Household goods which have been placed in storage or shipped under the provisions of this paragraph may be shipped to the permanent duty station of the member upon his relief from indeterminate temporary duty." The question is have we by adopting that paragraph for storage purposes also adopted its transportation provisions? If the

answer is affirmative, we could then transport at government expense the household effect property stored in conformance with JER 8007-7 even though such transportation would cover more than 2500 pounds.
